DEVELOPED AT

FOSS research supported in part by

“Please create a Science series that presents the Virginia Framework like the **OUR WORLD** series does for Social Studies.”

That was the request we heard from around the state as we hosted teacher training sessions for the many districts that adopted the **OUR WORLD** series of books for History and Social Science.

We listened! **EXPLORING SCIENCE ALL AROUND US** student books for Grades 3, 4, and 5 are shipping now. Grade 2 will be available this summer.

Five Ponds Science books have been extensively checked and thoroughly researched and reviewed by a team led by Jill Sible, Ph.D. and Giti Khodaparast, Ph.D., both of whom are esteemed faculty members at Virginia Tech in Blacksburg. With bright colorful photos and engaging text that exactly follow the new Virginia Framework—all supported with an extensive online teacher program—**EXPLORING SCIENCE ALL AROUND US** is the right choice for your students.
